RE: Conference Call

Our conference call has been scheduled for Wednesday, August 12 at 1:00 p.m. Mountain Time. You can dial in from wherever you are and be connected to the conference call. The phone number is **1-800-685-4572** and the pass code number is **517075**. The call will be recorded for our records.

In order to allow a little time for preparation I would like to **have your completed proposal rating sheets no later than 12 noon Mountain Time on Tuesday August 11**. We will compare our scores and ratings first thing in the conference call. It has generally been found that advance assessment of the proposal rating sheets can help to identify areas that require discussion and thus shorten the length of the conference call.

I'm looking forward to working with all of you on this project.
